

Frontend Hackathon -Progress Report Till 12:00 PM- 18.07.2020 :- By Lokendra Singh

BAKERY AND RESTAURANT PAGE

Description: Starting from basic HTML, I added some stuff i.e “Navbar” using Bootstrap framework and modified the same with CSS. Have used just a ‘Prompt() method’ to include some of the “Javascript” programming language as well:

Screenshot of my work till now is as below:-

Route Map:-

(Not in functionality right now)

- 1). Included a logo depicting my Bakery and Restaurant page - This image is labeled for reuse by Google.
- 2). In Navbar: Links:- Home, About Us, Explore More-->Menu Card, Best Deals, Contact Us.
- 3). Search Bar :
- 4). Search Button:
- 5). Below Navbar, an Image which is also labeled as free to reuse by Pixabay.com.
