# Frontend Hackathon -Progress Report Till 12:00 AM- 19.07.2020 :- By Lokendra Singh

BAKERY AND RESTAURANT PAGE

Description: Starting from basic HTML, I added some stuff i.e "Navbar" using Bootstrap framework and modified the same with CSS. Have used just a 'Prompt() method' to include some of the "Javascript" programming language as well:

Screenshot of my work till now is as below:-

Route Map:-

(Not in functionality right now)

1). Included a logo depicting my Bakery and Restaurant page - This image is labeled for reuse by Google.

2). In Navbar: Links:- Home, About Us, Explore More-->Menu Card, Best Deals, Contact Us.

3). Search Bar :

4). Search Button:

5). Below Navbar, an Image which is also labeled as free to reuse by Pixabay.com.

Adding Further till 12:00 AM 19.07.2020;-

6). Have created a simple slideshow at two ends of the section at the very beginning of the home page by using "Animation" functionality in CSS.

7). Have put a simple working layout designed in Adobe XD just below the slideshow containing section.

8). Have named the Bakery & Restaurant as "BR's Town" where BR stands for "Bakery & Restaurant"
